## SKILLS

mobile application development user experience (ux) design process design personalized service  
user registration user profile usability artificial intelligence

## DETAILS

Smooth Migration Global, a Canadian startup specializing in global relocation services, aims to enhance the relocation experience for individuals moving to Canada, USA, UK, and South Africa. The project involves developing a prototype for a mobile app powered by AI, designed to streamline access to various relocation services offered by the company's partners. The app will allow users to sign up, create a profile, and receive personalized service recommendations based on their specific needs. This project provides an opportunity for learners to apply their knowledge in mobile app development, user experience design, and AI integration. The goal is to create a user-friendly interface that effectively connects users with the services they require, improving their relocation experience.

## DELIVERABLES

The project deliverables include a functional prototype of the mobile app, featuring a user registration and profile creation system. Additionally, the app should incorporate AI-driven service recommendations tailored to user profiles. A comprehensive report detailing the app's development process, design choices, and AI integration strategies will also be provided. The prototype should be tested for usability and functionality, ensuring it meets the needs of potential users.

## About the company

Company

<https://www.smoothmigration.ca>

Vancouver, British Columbia, Canada

2 – 10 employees

Consumer goods & services, Hospital, health, wellness & medical, Insurance, Real estate, Trade & international business

We are a Specialized Global Relocation Services Company, with an established network of international partners in Canada, South Africa, USA, and the UK.

We provide tailored services to new residents in each of our operating locations, to ensure a smooth start for each client upon arrival to their new country.

## Answered questions

### QUESTION 1

Be available for a quick phone/virtual call with the instructor to initiate your relationship and confirm your scope is an appropriate fit for the experience.

Yes

### QUESTION 2

Provide a dedicated contact person who is available for weekly/bi-weekly drop-ins to address learners' questions as well as periodic messages over the duration of the project.

Yes

#### QUESTION 3

How is your project relevant to the experience?

Based on the information on the profile, this would match key points and potentially be a suitable project

#### MATCH COMPATIBILITY

## COMPATIBILITY

**Great**

## JUSTIFICATION

The project and experience align well, as both focus on mobile app development and software engineering, providing learners with practical experience in planning, design, and implementation. The project's intermediate difficulty level matches the experience's desired difficulty levels, and the flexibility of the project allows for adaptation to meet the specific needs of the learners. Additionally, the deliverables and skills required in the project complement the experience's goals of developing software systems and enhancing communication and project management skills.
